

STORAGE RECOMMENDATIONS

For Consumables

The quality of the consumables is essential for a good printing quality. For an optimized lifespan and use, they have to be handled and stored under specific conditions. The following recommendations are the optimal storage conditions for best print quality. These are based on our current know-how and observations but are not a warranty on the products.

GENERAL STORAGE RECOMMENDATIONS

For all the Evolis supplies (color, monochrome or security ribbons, cards and cleaning kits) it is recommended to store them in dark place avoiding dust, direct sunlight, high humidity and high temperatures. These products must not be placed near solvents or other chemicals.

CONSUMABLE	STORAGE TIME Unopened	STORAGE TIME After Opening	STORAGE TEMPERATURE
COLOR & MONOCHROME RIBBONS	1 year	6 months	5-25°C / 41-77°F
SECURITY RIBBONS	1 year	6 months	5-25°C / 41-77°F
CARDS*	2 years		5-25°C / 41-77°F
CLEANING KITS	2 years We recommend to use cleaning materials (swabs, cards, etc.) right after the opening in order to ensure product efficiency.		15-30°C / 59-86°F

* For an optimized lifespan and use, temperature of storage of Paper cards and PLA/WOOD cards must be around 23°C (73°F) and at RH around 50%.
